Highlights

Gel body headphones
Designed specifically with comfort in mind, using soft gel materials for a headphone body that moulds gently to the shape of your ear shell.

Super soft rubber caps
The ultra-soft rubber material on the rubber caps is sensational to the touch and adapts effortlessly to your ear. In-ear headphones have never been this comfortable.

For a snug and natural fit
Angled Acoustic Pipe is ergonomically designed according to the anatomy of the human ear canal. It fits in the ear so snugly and comfortably that you can put it on and simply forget about it.

For most directional sound
Angled Acoustic Pipe is designed according to the curvature of the human ear canal so that sound waves from the speaker are directed precisely to your ear drum with the highest definition

For best sound at low volume
You don't have to turn up the volume in noisy places any more. Angled Acoustic Pipe and the perfectly sealing ear buds cut off background noise significantly, delivering the same quality sound at a lower volume and with a longer battery life.

For booming sound and power
The speaker driver is made of a composite Mylar material for a highly sensitive yet powerful element that enables superior power output and delivers high-fidelity sound without any audible distortion.

Carry case
This case is the most convenient way to look after your headphones and prevent the cable tangling when not in use.

For optimal fit in all ears
With a choice of 3 interchangeable ear caps from size small to large, surely there is a pair that fits your ear perfectly.
